

FORTEK Aerospace, LLC Warranty Policy

FORTEK Aerospace warrants that all Inspected, Repaired or Overhauled articles serviced at our facility will be free from defects in material and workmanship at the time of delivery.

Electronic components are tested, and their function verified at the time of test. There is no way to verify the service life of an electronic component without destroying it. Therefore, it is FORTEK Aerospace's policy to warrant only the electronic components replaced at the time of repair/overhaul.

FORTEK Aerospace's total liability is expressly limited to the repair/replacement of defective parts or workmanship. This warranty is in lieu of all other warranties, whether expressed or implied.

Procedure for warranty claim:

Components that fail during the warranty period should be returned to FORTEK Aerospace within 30 days after failure for warranty evaluation. If the failure is found to be related to parts previously supplied, replaced or repaired by FORTEK Aerospace, then FORTEK Aerospace will repair or replace such parts.

FORTEK Aerospace reserves the right to refuse any warranty claim under the following conditions:

- 1) Customer failed to pay for service as agreed
- 2) Components are damaged in shipment to FORTEK's facility
- 3) Component is exposed to adverse environment rendered it defective by improper storage
- 4) Component has been improperly installed by customer or end user
- 5) Component has been shipped back for warranty evaluation after 30 days
- 6) Component received with the warranty seals removed, repaired, or alteration at a place other than FORTEK Aerospace

Warranty periods:

Bench check / Test: 0 months

Repair: 6 months

Overhaul: 12 months
